

IRISmart™ Invoice

Be Smart. Just classify!

Ideal for freelancers as well as any manager or accountant: IRISmart Invoice will help you to manage your daily invoices in a superefficient and organised manner.

Any manager who wants to quickly and consistently file their invoices into ordered folders and would like to monitor their expenses more closely will find IRISmart Invoice to be a major ally.

It will be a valuable aid for financial or accounting managers in charge of managing expenses. They will gain a direct, summary view into all of their incoming invoices, which are then classified, commented on, categorized, and even pre-posted!

In addition to easy, semi-automatic sorting of your invoices, IRISmart Invoice enables you to keep a summary view of all of your expenses.

The software generates a single Excel file, automatically listing all of the key data extracted from your invoices (supplier, date, amount VAT...). This file centralises the essential information so that you can monitor your expenses. This is a valuable feature for any manager, accountant or other financial manager. This file (with a hyperlink to each invoice document) can also be sent or shared with your fiduciary or financial manager so they can approve payments.

Quick reference guide

Product name	IRISmart™ Invoice
SKU - ESD - 500 invoices	459045
SKU - ESD - 1000 invoices	459050
SKU - ESD - 3000 invoices	459051
Interface languages	English, Spanish, French, Japanese, Italian, Dutch, German, Hungarian, Czech

Refill system

IRISmart Invoice has a reservoir that holds a certain amount of invoices per year. This reservoir contains 500, 1,000 or 3,000 invoices depending on the version. One invoice is a paper or electronic document with one or more pages.

Processing one invoice decrements the IRISmart Invoice counter by one unit. When the reservoir is close to empty, a message prompts you to reload your counter. Refills (tanks) of 500, 1000, or 3000 invoices per year are available.

Key benefits

Intelligent classification of all your invoices

- Easily sort out, manage & share all your expenses with your accountant/fiduciary
- Classify easily piles of documents into the right folders, locally or in the Cloud
